

Dear FCC Representative:

The airing of an anti-Kerry documentary days before the election by Sinclair Broadcasting clearly illustrates the danger of media consolidation.

Companies that use the public airways free of charge in the way that Sinclair does must serve all public interests as required by law. Otherwise our democracy is controlled by corporate interests and not the American public.

Please consider utilizing stories from our communities and substantive news about issues that matter. The recent actions of Sinclair Broadcasting demonstrates that we must strengthen media ownership rules.

Sincerely,
Pamela Dodge
